Guilherme Couto

Software & Product | Solving problems
Brasília, Federal District, Brazil

Summary

Software Engineer with 5+ years of experience building and optimizing web applications. I help companies improve user experience, performance, and development workflows by combining strong frontend expertise with backend versatility and a user-centered mindset.- At Tradex, I took ownership of code quality initiatives amid a fast-paced startup culture, leading refactoring efforts and introducing improved development patterns — including test coverage — to keep the codebase scalable as the product evolved rapidly.- As Principal Engineer at Escola de Choro Raphael Rabello, I defined the product's business rules and designed intuitive and responsive interfaces. I streamlined the development and deployment process to ensure fast and reliable releases.- At Alura, I refactored a product's architecture by creating a dynamic data template, eliminating repetitive tasks and cutting 35K+ lines of code. I also improved web performance metrics (LCP, FCP) by 30%, directly enhancing SEO and user experience.Let's connect! Experience

Tradex

Software Engineer

February 2024 - Present (2 years 3 months)

São Paulo, SP

- Took ownership of code quality initiatives, leading refactoring efforts and introducing improved development patterns, including test coverage and modular architecture practices.

- Demonstrated adaptability by working across multiple stacks — including Angular, Django, PostgreSQL, and Flutter — quickly learning unfamiliar technologies and contributing to cross-platform deliverables.
- Delivered critical features under tight deadlines while maintaining high quality standards, directly supporting strategic product launches and enhancing development velocity.

Escola de Choro Raphael Rabello

Principal Engineer

June 2023 - December 2025 (2 years 7 months)

Brasília, DF

Developed an end-to-end application, from conception to maintenance:

- Designed responsive and intuitive interfaces using React, Vite, ChakraUI, React Query, among other libraries.
- Implemented business logic with Django and PostgreSQL.
- Automated the deployment process using CI/CD practices with Firebase and GitHub Actions.

React Query library was used to cache backend data, achieving low infrastructure costs (> USD 1.00/month).

- Continuously monitor and maintain services to ensure stability and efficiency.
- Increased SEO metrics, receiving 5K/month impressions on Google.

Alura

Frontend Engineer

June 2022 - September 2024 (2 years 4 months)

São Paulo, Brasil

- Identified a pattern in the manual replication of files for a product. Every replication requested a new task for the team. I developed a dynamic PHP template that automates the insertion of new data, eliminating the need for manual replication. New entries became automatically accessible after registration, optimizing the workflow, reducing operational errors, and eliminating the need for new tasks. This refactoring took down 35K+ lines of code from our codebase.
- Optimized web pages with low-performance metrics (LCP and FCP). Implemented solutions to improve loading speed, such as managing third-party code, async/defer, and lazy loading. These improvements resulted in a 30% reduction in page loading times, significantly enhancing the user experience and SEO metrics.

- Maintained and customized a Shopify-based e-commerce platform, handling storefront updates, theme adjustments using Liquid, and seasonal campaigns such as Black Friday. Collaborated with marketing and design teams to ensure timely rollouts of visual changes while preserving site performance and SEO integrity.

Câmara dos Deputados

Intern

March 2019 - March 2020 (1 year 1 month)

Brasília, Distrito Federal, Brasil

I worked in the Reference and User Service sector of the Pedro Aleixo Library from Câmara dos Deputados.

Universidade de Brasília

Peer Coach

July 2018 - July 2019 (1 year 1 month)

Brasília, Federal District, Brazil

I was a teaching assistant for the course Planning and Development of Databases at the Department of Information Science for two academic semesters.

Education

Universidade de Brasília

Library & Information Science, Information Science · (July 2016 - April 2025)
